STOP! Don't turn the page or freely read this book! Once this puzzle book has been unlocked, you only have access to the opposite page, which contains the first puzzle. **Only turn to the next two-page spread in the book when the section book tells you to do so.**

The solution to each puzzle in this book is a three-digit number, which should be written down on the relevant page spread. For all three-digit solutions, the first two digits refer to a page number in the section book and the third number is the section on that page (e.g. the number XYZ points to  XY.Z). This section should be read immediately once the solution has been found. If there are two places in a spread to write a three-digit number, this means the subsequent puzzle doesn't have any information provided in this book, and its solution should be written down on the same spread.

Keep in mind that the puzzles may require additional information found on other components in the game. Context clues about what components to reference can generally be found in the section that introduces the puzzle. This first puzzle, however, does not require any additional information to solve.
